Dear Cliff and Diana,

I drove the roads with Tom Crisp yesterday to get an idea of possible work for spring and bid to present to the board. while we were viewing the project, we took a moment to lok at the hazard in our easement on the road north of the pavilion. Tom Crisp estimated it would take two truckloads tin each spot to alleviate hazards for winter. I believe this will eliminate winter risk with the gully which we can followup in the spring. Four truckloads equal \$800, \$200 per truck. If seems adequate for now, I would like to contact him and place these loads before snow.

For a proper **action without a meeting**, please reply and sign your name with any comments if yo agree.

Tom LeFevre

Tom,

Seems reasonable to me. Please document the bid and obtain a receipt. As the year comes to a close, let us wrap up all the loose ends.

Thanks for your work and arranging the hazard repair.

Clifford Johnson
HVPOA Vice President
