While checking out the Road base that Crisp const. is crushing and preparing for our road work thursday Which looks good by the way..
I asked mr. Crisp when they would be hauling to the stock piles? He responded that he was waiting for the roads to dry out a little
So he would not damage them any with the heavy loads. There are over 100 loads ready to deliver, my request for AWM is
to pay T.Crisp the 800\$.for 1 snow plow as well as 4000.00 Toward the gravel he has ready to deliver.
Have talked to Boyd also
Thanks all , Summers on the way 🙏. TOM L. Sec.HVPOA

I approve on the basis that the snow plow invoice is for work during the last storm and that you have negotiated a firm price per ton or other unit of measure in place and compacted on the roads. Tom, our approvals need to be specific and based on a specific set of criteria each time to avoid confusion or criticism at the time of payment of the bill.

I'm a little lost when it comes to the \$800 for snow. I thought we were all paid up for snow removal. Is there an invoice for snow work we have not paid? If it is money to come out of the snow budget rather than road work budget, I would rather see the money come from the correct budget allocation. We, or a future board, will need to know an accurate amount for snow for future forecasts.

I do approve stockpiling gravel. I am fine with \$4.000 for gravel purchase. In fact, if the price is competitive, I am all for putting as much gravel on the roads as we have money to buy. I am sick of walking in mud and having put pull people out. Let's see some numbers and move forward with buying gravel.

Thanks to all for doing the leg work and tracking down road work!
